Alpha Data will be changing certain products in its range.

This notice lists the affected products and the nature of the changes.

Product(s) Affected:

Current Part Number	New Part Number
ADM-XRC-6T1 (all Industrial grade versions) Serial number tbd onwards	No Change

Description and Purpose of Change:

Operation of the Bridge FPGA configuration interface does not match revised Xilinx specification. In rare cases, this can result in the Bridge FPGA failing to configure at power-up.

The interface is controlled by a CPLD and a new version of the CPLD firmware is available to resolve the issue. All new products shipped after 10th August, 2016 will include the revised firmware.

Existing products can be modified by reprogramming the CPLD using a Xilinx JTAG programmer. Alpha Data can perform the update or provide a copy of the CPLD firmware image for field update.
Please contact sales@alpha-data.com for details.

Impact on Form, Fit or Function:

Form: None
Fit: None
Function: Improved start-up reliability.

Effective Date of Change:

10th Aug, 2016
